About ApexBrasil

The Brazilian Trade and Investment Promotion Agency (ApexBrasil) works to promote Brazilian products and services abroad, and to attract foreign investment to strategic sectors of the Brazilian economy.

The Agency carries out several commercial promotion initiatives, such as commercial and prospective missions, business rounds, support to the participation of Brazilian companies in major business fairs, and visits of foreign buyers and opinion formers to assess the Brazilian productive structure, among other business platforms aimed to strengthen the Brazil brand.

ApexBrasil also acts to promote the competitiveness of Brazilian companies in their internationalization process, especially in market intelligence, business training and image promotion, as well as foreign direct investment (FDI) attraction.

In this regard, the role of ApexBrasil is to promote the expansion of investments already made, and to include Brazil in the "short list" of target countries and influence the investment decision by providing strategic information, full support to the work of site location (arranging and accompanying the visits of foreign companies to potential receptor States) and an aftercare work.
