About ApexBrasil

The Brazilian Trade and Investment Promotion Agency (ApexBrasil) works to promote Brazilian products and services abroad and attract foreign investments to strategic sectors of the Brazilian economy.

ApexBrasil carries out several initiatives aimed at promoting Brazilian products and services abroad, such as prospective and trade missions, business rounds, support to the participation of Brazilian companies in major international trade shows, visits of foreign buyers and opinion makers to Brazil to learn about the local productive structure, among other business platforms that also aim at strengthening the Brazil brand.

The Agency also acts in a coordinated way with public and private players to attract foreign direct investment (FDI) to Brazil with a focus on strategic sectors for the development of the competitiveness of Brazilian companies and the country. Internally, there is a concern to provide employees with an egalitarian and fair organizational environment. This was recognized with the Great Place to Work certification, received in 2020, 2021 and 2022.

Açoforja S.A - 31

acoforja.com.br/en/segmentos/petroleum/

Andreison Freire Sá

afreire@acoforjqa.com.br

+55 31 98489-5709

Açoforja SA is an open die forge with medium/heavy capacity, certified by ISO 9001 and ISO 14001. We work with vacuum degassed carbon steels or low alloy steels, and we have a heat treatment shop with furnaces qualified to fulfill the API standards requirements.

Christmas Trees, Manifolds, Connectors, Plates, and Valve Bodies. Additionally, we produce bars, discs, rings, and drafts according to client drawings or project specifications.

ALTAVE - 6

altave.com.br/en/oil-gas/

Raquel Caratti Piani

marketing@altave.com.br

+55 12 98124-4466

ALTAVE promotes O&G safety with cutting-edge tech and expertise in innovation. Our IVA is a robust solution for enhancing operational situational awareness and efficiency, ensuring proactive risk mitigation, accuracy, adaptability, and actionable intelligence for sector leaders across 5 continents.

Auto Object Counting, Fire and Smoke Alert, Hands on the Handrail, Detection, Head Counting System, HARPIA software for Intelligent, Video Analytics data management, Loitering Detection, Man Down Alert, Oil Spill Detection, Object Removal Detection, Operator under, Suspended Load Detection, PPE Compliance Detection, Red Zone Management.

Altus Sistemas de Automação S.A. - 27

www.altus.com.br

Fernando Rodrigues Staudt

fernando.rodriques@altus.com.br

+55 51 99862-8334

Altus has been delivering solutions to customers and partners from different sectors of the industry for 40 years. From very small systems to complex applications, Altus range of products can meet all demands of the market, delivering features that fill each and every element required by the customers' needs. Acting globally, the company is constantly evolving in order to be competitive and to add value to its partner's business.

Nexto Series of Programmable Controllers (PLCs)

Biosolvit - 38

www.linkedin.com/company/bioblue/

Guilherme Pinheiro de Queiroz
guilhermo@biosolvit.com
+55 24 99976-2855

Biosolvit is a products provider for oil spill accidents which has developed the most efficient oil absorber in the world according to Cedre Institute of France.

BioBlue Ecofast Organic Absorber, Natural Absorbent BioBlue Ecofast, Dual Fence BioBlue Ecofast, Offshore Absorption Barrier BioBlue Ecofast, Absorption Barrier BioBlue.

Blinda - 32

www.blinda.com.br/en/

Emerson Esteves
emerson@polarb2b.com
+55 22 99206-9626

For over the past 60 years, Blinda has been a reliable manufacturer of Ex equipment, providing items for hazardous areas in all industrial segments where there is a high standard of demand. Most recently, Blinda supplied local control stations, junction boxes and distribution pannels for the building of the FPSOs Almirante Tamandaré and Alexandre Gusmão.

Ex e Control Units, Ex e/ Ex d Control Stations, Ex e/ Ex d Control and Distribution Systems, Ex e/ Ex d Junction Boxes, Ex e/ Ex d Cable Glands.

BR2W - 33

Rosanamary Garbuio Ellis

rosana.ellis@phdsoft.com

+13143974682

By providing a clear understanding of the aging process and associated risks over time, C4D® / Web Digital Twin® reduces maintenance costs and mitigates risks and unplanned downtime. Furthermore, it facilitates business continuity and extends the lifespan of the asset. With our cutting-edge solution, clients can rest assured that their assets are operating efficiently and effectively, and that their business operations are running smoothly.

PhDsoft's C4D® / Web Digital Twin® is an advanced solution for asset structural integrity that uses digital twin, IoT, and AI technologies to streamline the inspection, monitoring, and maintenance process. By collecting data from various sources, the platform predicts corrosion progress, assesses risks, recommends repairs, and consolidates documentation.

Pix Force - 21

• www.pixforce.com.br/en

Daniel Rodrigues Moura

• daniel.moura@pixforce.com.br

• +55 51 98191 0555

Focused on automating visual inspection and monitoring processes, Pix Force specializes in developing AI algorithms applied to computer vision. The company uses machine learning and deep learning techniques to automate the interpretation of images, whether photos or videos.

Pix Grid: Set of solutions with AI algorithms for monitoring and inspecting assets in the electricity sector, such as transmission lines and photovoltaic plants using drones, as well as monitoring non-technical losses in rural areas using satellite images;

Pix Blue: AI remote sensing system for identifying oil in water, using images from hyperspectral and RGB cameras, sensors and satellites;

Pix Safety: AI system for detecting deviations from safety standards during work activities, controlling access to restricted areas efficiently and detecting the use or non-use of PPE appropriately, preventing risk situations;

Pix Counter: Computer vision system for automatically counting items in images;

Pix Quality: System for detecting and analyzing corrosion and other anomalies on oil platforms, through images captured by drones that fly completely autonomously;

Idexa: Platform for processing document data, extracting data from fields and incorporating them into forms and ERP systems.

In addition to the products already developed, Pix Force has professionals qualified to meet new demands, developing personalized products according to the exact needs of the contractor, through our innovation laboratory – Pix Labs.

Founded in 1993, Techocean Offshore has consolidated itself into one of the biggest companies in the naval repair and maintenance business, focusing on the execution of projects in the Oil & Gas area in drilling units. Nowadays we have around 300 employees working in 02 service regimes: Offshore: serving drilling units and accommodation; Manufacturing: manufacturing from light to heavy boiler projects, low and high pressure piping in several alloys for the oil & gas naval industry. Techocean's great differential is to remain stable in the market even when facing great challenges, becoming a solid option for the market.

All our professionals are qualified to work offshore, having the certifications required by national and international legislation, such as BST, HUET, besides their respective qualifications according to the function of each professional.

TGS - 10

Specializes in advanced technology solutions for the Oil, Gas, and Energy sectors, focusing on AI, Digital Twins, and data analysis. Provide insights for strategic decisions and operational efficiency, are committed to innovation in business process improvement and cost reduction across industries.

Customized solutions that use AI, Digital Twins, BigData, BI/BA, RPA, Blockchain and IoT for the Oil, Gas and Energy market.

TIEP: Predictive System, based on AI, which captures internal and external data, processes and analyzes this information, to efficiently anticipate the price and demand for Electricity and Natural Gas, helping companies make decisions.

OADS: Anomaly diagnosis system capable of measuring the condition of the lubricating oil, evaluating the presence and concentration of contaminants and machine wear.

TIST: Smart Digital Twin Tool for FPSOs to predict structural failures, optimizing maintenance in Industry 4.0.

The Insight Blue Opex: People and operations management solution that gathers and analyzes data. The tool identifies possible gaps in management processes and indicates opportunities for cost reduction.

Vanasa Multigas is a Brazilian company founded in 1999. Since our creation, the focus has been on the product market for the oil and gas sector. With our 25 years of experience, studies, and research, we are able to offer a highly qualified professional engineering and manufacturing service. Our Company offers the best technical and economic solution to any problem related to treatment, measurement, control in compliance with the international standards required by the market. The quality System applied by Vanasa Multigas follows ISO 9001 / 14001 / 45001 standards. Due to high quality standards and specialized personnel, Vanasa Multigas can follow its customers since project creation than until delivery of the turnkey system.

GAS STATION, DUAL CHAMBER ORIFICE FITTING, REGULATORS, METTERS, STATION METTER, PIG LAUNCHER AND RECEIVER, HEATERS, BASKET, CARTRIDGE AND SEPARATOR FILTERS, COMPACT SKIDS SOLUTIONS AND SPECIAL PRODUCTS FOR ALL APLICATIONS WITH ALL KIND GAS.

Vidya Technology - 30

Janaina Heuko Albino

janaina.albino@vidyatec.com

+55 41 98748-1965

Vidya is a deeptech that leverages AI, spatial computing, and software to enhance industrial asset integrity and performance using applications of the Vidya Platform. Transforming data, images, reality capture, and documents into scalable tools for monitoring and maintenance of industrial plants.

Digital Fabric Maintenance (DFM): Identify corrosion and other anomalies using Artificial Intelligence, and instead of a report, have a traceable and auditable coating management process visually contextualizing components, areas, locations, and prioritizations on a 3D environment.

Naval Digital Tracking - Support the structural integrity analysis of tanks with anomaly detection and contextualization, management of hull historical data, traceability of new inspections, thickness loss, corrosion prediction model, and visual models to identify critical regions for integrity.

Digital Hull Integrity - View, locate and classify potential discontinuities, pitting, critical corrosion points and other hull anomalies. Acquire results based on inspection standards by combining reality capture and artificial intelligence in a 3D environment.

Digital Well Integrity - Streamline Integrity management of wells, including document management, operational parameters monitoring, alert generation, and management of work orders.

Web Nordeste - 29
